

SMART CHOCOLATE FACTORY

Intelligent Automation for All Type of Orders

SCAN ME

Automated production and packaging system for chocolates that integrates collaborative robots, ESP32 devices, and MQTT communications to manage orders, intelligent stock control, and automatic palletizing in a synchronized and safe way.

Flexible Production

Adaptation to customized or mass-production orders

Intelligent Communication

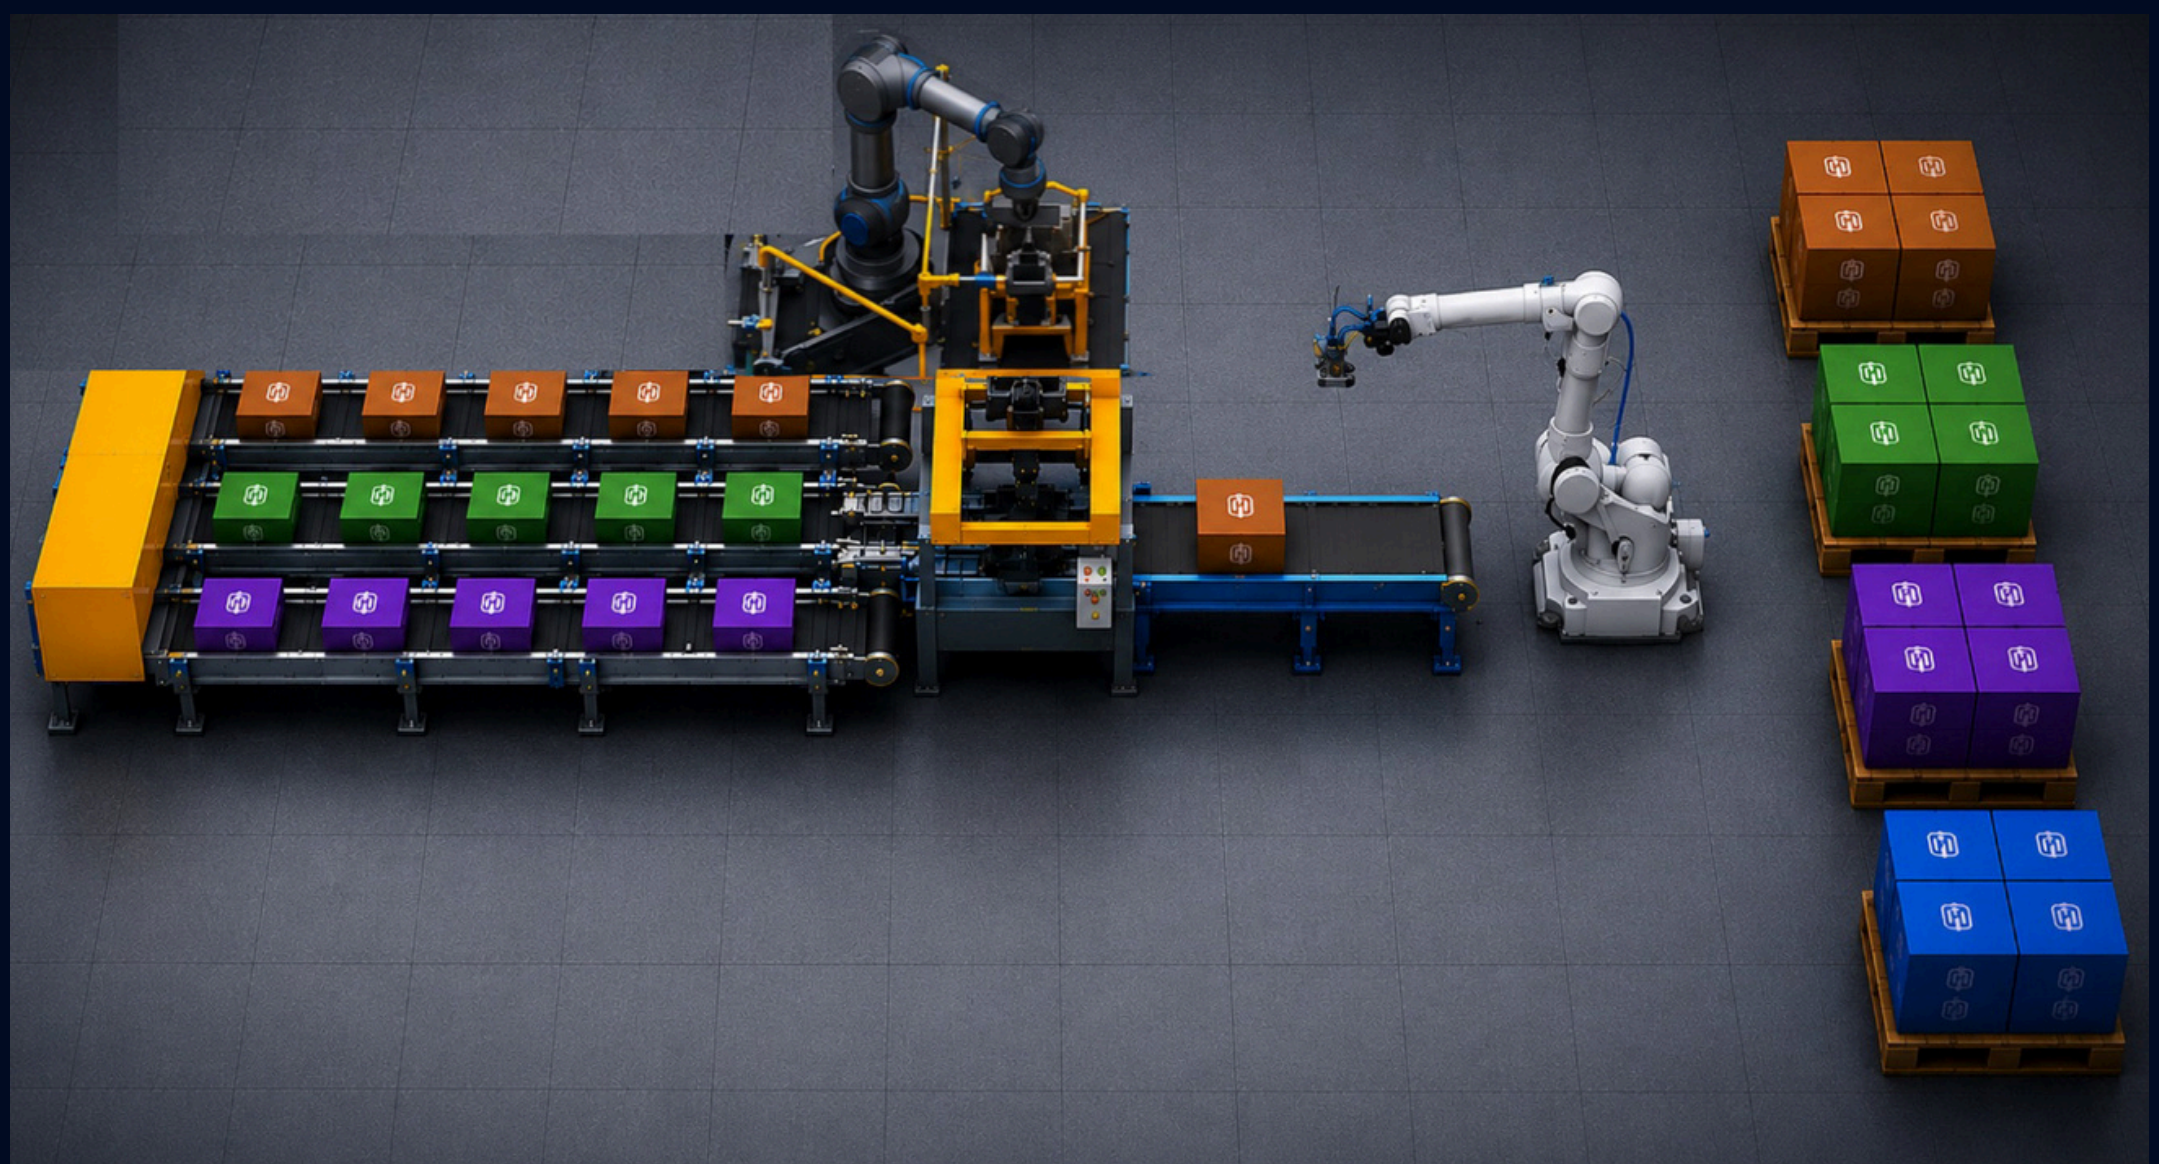

MQTT messaging for real-time synchronization

Real-Time Monitoring

Stock and production process control

Industrial Safety

Photocells, sensors, and emergency stops
